HERE ARE TELECONNECT'S PICKS FOR THE HOTTEST PRODUCTS OF '97
— FROM PBXS TO VOICEMAIL TO ESOTERIC TEST EQUIPMENT —
EVERY MAJOR TELECOM PRODUCT CATEGORY IS REPRESENTED

LUCENT'S PARTNER ACS KEY SYSTEM

Lucent Technologies (Basking Ridge, NJ) makes a great, small 3 X 8 key system that grows like nothing else we've seen. Great features: PC-programmable, TAPI-compatible (for PC-screen pops/dialing), battery/ PCMCIA-card programming backup, caller ID, paging, door openers and MOH without giving up station/trunk ports, etc. Best of all: a small, adequate voicemail that tightly integrates across the system's backplane (no station ports taken). Also, great phones with readable LCDs. Programmed to ring and work right out of the box. Systems like this start around \$5,600.

Lucent's Partner ACS: a small key system and voicemail/auto attendant (a plug-in PartnerMail VS module), with extras.
